

# AC1 : Key Outcomes – Year 10

## Curriculum: Science

**Excellence.  
No Excuses.**

Section	Knowledge Code:	Outcomes:	How students will demonstrate success:
<b>1</b>	S10.1.1 Structure of the atom	SWBAT <ul style="list-style-type: none"> <li>Identify the Rutherford (nuclear) model of an atom.</li> <li>Identify the locations of protons, neutrons, and electrons in the nuclear model.</li> <li>State that electrons can move between fixed energy levels within an atom.</li> </ul>	<ul style="list-style-type: none"> <li>Labelling a diagram with and matching properties to particles.</li> <li>Explain in an extended writing task what happens to electrons when they emit or absorb radiation.</li> </ul>
<b>2</b>	S10.1.2 Mass number, atomic number and isotopes/RAM	SWBAT <ul style="list-style-type: none"> <li>Identify the mass and atomic number by using nuclear notation.</li> <li>Describe how isotopes are atoms of the same element with different mass numbers.</li> </ul>	<ul style="list-style-type: none"> <li>Determine the atomic number, mass number and number of neutrons of an atom using the periodic table</li> <li>Give the definition of isotopes.</li> <li>Use relative abundance figures to calculate the relative atomic mass of elements with non-integer RAMs</li> </ul>
<b>3</b>	S10.1.3 Relative electrical charges of subatomic particles	SWBAT <ul style="list-style-type: none"> <li>Name and give the relative charges and mass of the subatomic particles</li> </ul>	<ul style="list-style-type: none"> <li>Complete and extended writing task that names the subatomic particles, giving their location, mass and charge in relative units.</li> </ul>
<b>4</b>	S10.1.4 Electronic structure	SWBAT <ul style="list-style-type: none"> <li>Write the standard electronic configuration notation from a diagram for the first 20 elements.</li> <li>Explain why elements in the same group react in a similar way.</li> </ul>	<ul style="list-style-type: none"> <li>Use the periodic table of elements to give the electron structure and draw the electrons shells of any of the first 20 elements.</li> <li>State the link between group and electrons in outer shells. Linking that to their reactions.</li> </ul>
<b>5</b>	S10.1.5 The Periodic Table	SWBAT <ul style="list-style-type: none"> <li>Use the Periodic table to find atomic number and mass number data and use it to determine the number of each sub-atomic particle in any given form.</li> <li>Recognise and describe patterns in sub-atomic particles of elements listed in the Periodic Table.</li> <li>Explain why we can be confident that there are no missing elements in the first 10 elements of the Periodic Table.</li> <li>Describe the development of the periodic table by mendeleev et al.</li> </ul>	<ul style="list-style-type: none"> <li>Link periods and group numbers to number of shells and electrons in outer shells respectively</li> <li>Describe Mendeleev's and Newlands models of the periodic table.</li> <li>State how they are different to current table</li> <li>Explain why Mendeleev's model was better</li> </ul>
<b>6</b>	S10.1.6 The development of the model of the atom	SWBAT <ul style="list-style-type: none"> <li>Identify the Rutherford (nuclear) model of an atom.</li> <li>Identify the locations of protons, neutrons, and electrons in the nuclear model.</li> <li>State that electrons can move between fixed energy levels within an atom.</li> <li>Compare the plum pudding model, Rutherford model, and Bohr model of the atom in terms of the evidence for each model.</li> <li>Explain how Rutherford and Marsden's experiment caused a rejection of the plum pudding model.</li> <li>Describe how the initial evidence for the nuclear model was processed and how the model came to be accepted.</li> </ul>	<ul style="list-style-type: none"> <li>Describe both models of the atom in terms of distribution of mass, charge and matter.</li> <li>Describe the experiment carried out by Rutherford</li> <li>Say how the two conclusions from the Alpha scattering experiment disproved PPM</li> <li>Say how they supported NM</li> <li>Combine all above into an extended writing response.</li> </ul>

# AC1 : Key Outcomes – Year 10

## Curriculum: Science

**Excellence.  
No Excuses.**

Section	Knowledge Code:	Outcomes:	How students will demonstrate success:
7	S10.1.7 Transition Metals	SWBAT <ul style="list-style-type: none"> <li>Describe the difference between transition metals and Group 1 in melting points, densities, strength, hardness and reactivity with oxygen, water and halogens.</li> <li>Exemplify these general properties by reference to Cr, Mn, Fe, Co, Ni, Cu.</li> </ul>	<ul style="list-style-type: none"> <li>Use knowledge and data to make a comparison between properties of different groups and transition metals.</li> <li>Link properties of transition metals to their uses</li> </ul>
8	S10.1.8 Radioactive decay and nuclear radiation	SWBAT <ul style="list-style-type: none"> <li>Name the three types of nuclear radiation.</li> <li>Name the three sub-atomic particles found in an atom (proton, neutron, and electron).</li> <li>Describe the relative penetrating powers of the three types of nuclear radiation.</li> <li>Describe in detail the decay of an unstable nucleus.</li> <li><b>Explain the similarities and differences between nuclear radiation and visible light.</b></li> <li><b>Explain why particles are ejected from the nucleus during nuclear decay.</b></li> </ul>	<ul style="list-style-type: none"> <li>Give the names and properties and source of the three types of ionising radiations in extended writing.</li> </ul>
9	S10.1.9 Nuclear equations	SWBAT <ul style="list-style-type: none"> <li>Describe the changes in the nucleus that occur during nuclear decay.</li> <li>Write full decay equations, for example, nuclear decays.</li> </ul>	<ul style="list-style-type: none"> <li>Recall the general equations for the three types of radiations.</li> <li>Use the equations to predict the products formed from the different radiations</li> </ul>
10	S10.1.10 Half-lives and the random nature of radioactive decay	SWBAT <ul style="list-style-type: none"> <li>State that the activity of a radioactive sample will fall over time.</li> <li>Define half-life in simple terms such as ‘the time it takes for half of the material to decay’.</li> <li>Find the half-life of a substance from a graph of count rate (or nuclei remaining) against time.</li> <li><b>Compare a physical model of decay with the decay of nuclei, noting the limitations of the model.</b></li> </ul>	<ul style="list-style-type: none"> <li>Draw a graph from secondary data and use this to deduce half life graphically.</li> <li>Use data provided to calculate half life from activities over time or activity over time from half life without graphs.</li> </ul>
11	S10.1.11 Radioactive contamination	SWBAT <ul style="list-style-type: none"> <li><b>Define contamination and irradiation</b></li> <li><b>Describe some safety precautions used when dealing with radioactive materials.</b></li> <li><b>Describe how a Geiger counter can be used to detect radiation.</b></li> <li><b>Identify natural and man-made sources of background radiation.</b></li> </ul>	<ul style="list-style-type: none"> <li>Extended writing – compare and contrast contamination and irradiation.</li> </ul>
12	S10.1.12 Background radiation	SWBAT <ul style="list-style-type: none"> <li><b>Define background radiation and explain its sources.</b></li> </ul>	<ul style="list-style-type: none"> <li>Label a pie chart showing source of radiation</li> <li>Explain in writing that man made forms of background radiation contribute a small part of the whole.</li> </ul>

# AC1 : Key Outcomes – Year 10

## Curriculum: Science

**Excellence.  
No Excuses.**

Section	Knowledge Code:	Outcomes:	How students will demonstrate success:
<b>13</b>	S10.1.13 Uses of nuclear radiation	SWBAT <ul style="list-style-type: none"> <li>• Outline how the age of organic material can be determined by using radioactive dating.</li> <li>• Calculate the changes in count rate or nuclei remaining by using an exponential decay function.</li> <li>• Describe the use of radioactive implants and the hazards associated with the technique.</li> <li>• Discuss the factors that need to be taken into account when selecting a medical tracer for a diagnostic test.</li> <li>• Explain how a medical tracer is used including the function of a gamma camera.</li> </ul>	<ul style="list-style-type: none"> <li>• Describe the different uses of radiation in written form.</li> <li>• Justify the choice of emitter for the different uses referring to the ALARA principle.</li> </ul>
<b>14</b>	S10.1.14 Nuclear Fission	SWBAT <ul style="list-style-type: none"> <li>• Explain how a steady-state induced fission reaction can be maintained.</li> <li>• Explain the differences between naturally occurring isotopes and enriched nuclear fuels.</li> <li>• Explain the operation of a nuclear fission reactor, including the choices of appropriate materials.</li> <li>• Discuss the risks and benefits of nuclear power compared to other methods of electricity generation.</li> <li>• Describe and explain the safety precautions that need to take place after a large nuclear accident.</li> <li>• Evaluate in detail a variety of storage or disposal solutions for nuclear waste.</li> </ul>	<ul style="list-style-type: none"> <li>• Draw/label a fission diagram.</li> <li>• Define and describe the process.</li> <li>• Explain the role of the neutron in this process</li> <li>• Extended writing: Compare the use of nuclear fission with another method of generating electricity and evaluate.</li> </ul>
<b>15</b>	S10.1.15 Nuclear fusion	SWBAT <ul style="list-style-type: none"> <li>• Explain why it is difficult to carry out controlled nuclear fusion on Earth.</li> <li>• Construct a variety of nuclear equations showing nuclear fusion.</li> <li>• Compare the operation of a nuclear fission reactor and a nuclear fusion reactor.</li> </ul>	<ul style="list-style-type: none"> <li>• Define it</li> <li>• Draw a diagram</li> <li>• Explain why it's hard, why is it easier in the sun/stars.</li> <li>• Link to life cycle of stars</li> </ul>

# AC1 : Key Outcomes – Year 10

## Curriculum: Science

**Excellence.  
No Excuses.**

Section	Knowledge Code:	Outcomes:	How students will demonstrate success:
<b>23</b>	S10.1.23 Chromosomes, mitosis and the cell cycle	SWBAT <ul style="list-style-type: none"> <li>Describe how DNA is found</li> <li>Describe the stages of the cell cycle, including mitosis</li> <li>Recognise and describe situations where mitosis is occurring</li> </ul>	<ul style="list-style-type: none"> <li>Give the size order of DNA/Chromosomes/cells etc.</li> <li>Explain the stages of the cell cycles in writing,</li> </ul>
<b>24</b>	S10.1.24 Stem cells	SWBAT <ul style="list-style-type: none"> <li>Define a stem cell</li> <li>Describe the function of stem cells in embryos, adult animals and meristems (plants)</li> <li>Explain how stem cells can be used as treatment for some conditions such as diabetes and paralysis</li> <li>Evaluate the practical risks and benefits, as well as social and ethical issues, of the use of stem cells in medical research and treatments.</li> </ul>	<ul style="list-style-type: none"> <li>As outcomes</li> </ul>
<b>25</b>	S10.1.25 Diffusion	SWBAT <ul style="list-style-type: none"> <li>Define diffusion</li> <li>Recognise, draw and interpret diagrams that model diffusion.</li> <li>Explain how different factors affect the rate of diffusion</li> <li>explain the need for exchange surfaces and a transport system in multicellular organisms</li> </ul>	<ul style="list-style-type: none"> <li>Give the definition of diffusion and state factors that affect its rate.</li> <li>Link these factors to the properties of specialised cells in places like like lungs or intestines.</li> </ul>
<b>26</b>	S10.1.26 Osmosis	SWBAT <ul style="list-style-type: none"> <li>Define osmosis</li> <li>Recognise, draw and interpret diagrams that model osmosis.</li> <li>Apply knowledge of osmosis to unfamiliar situations and make predictions.</li> </ul>	<ul style="list-style-type: none"> <li>Give the definition of osmosis.</li> <li>Identify which way osmosis is occurring in a range of diagrams/situations.</li> <li>Explain what is happening in writing in a range of contexts i.e. visking tubing with different solutions in different solutions.</li> </ul>
<b>27</b>	S10.1.27 Active transport	SWBAT <ul style="list-style-type: none"> <li>Define active transport</li> <li>Describe how substances are transported into and out of cells by diffusion, osmosis and active transport</li> <li>Explain the differences between the three processes</li> </ul>	<ul style="list-style-type: none"> <li>Define</li> <li>Explain why energy is required.</li> <li>Link the energy requirement to the number of mitochondria in cells in areas that carry out a lot of AT.</li> </ul>
